

Retinal Disease Classification

Kristen Cramer
Data Scientist

Defining the Problem

Early Detection

Data Analysis

Diabetes

Glaucoma

Cataract

Age Related Macular Degeneration

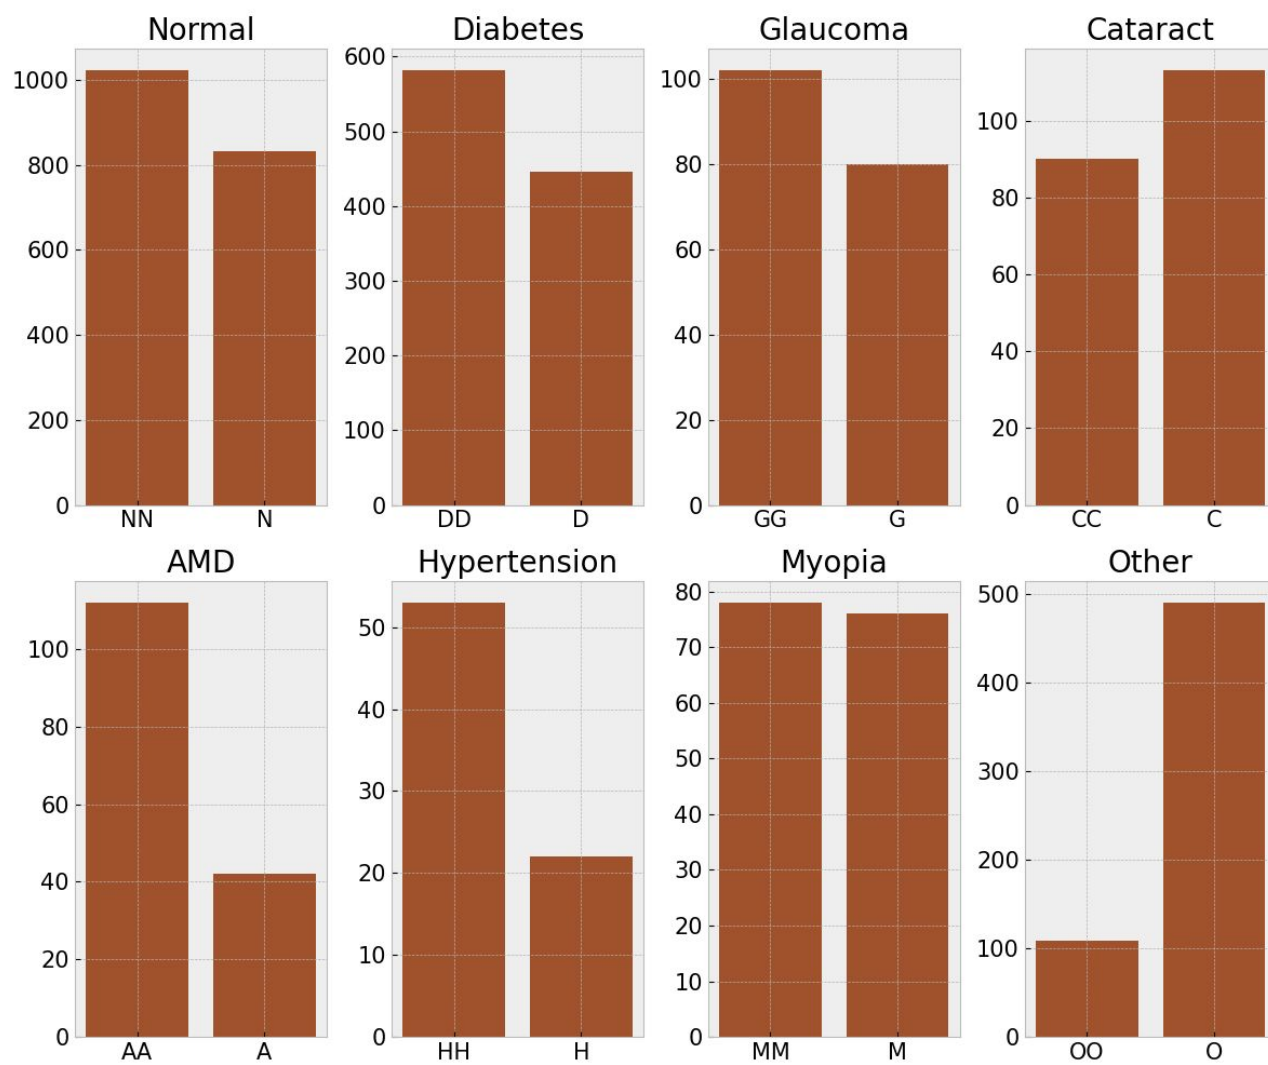

Hypertension

Pathological Myopia

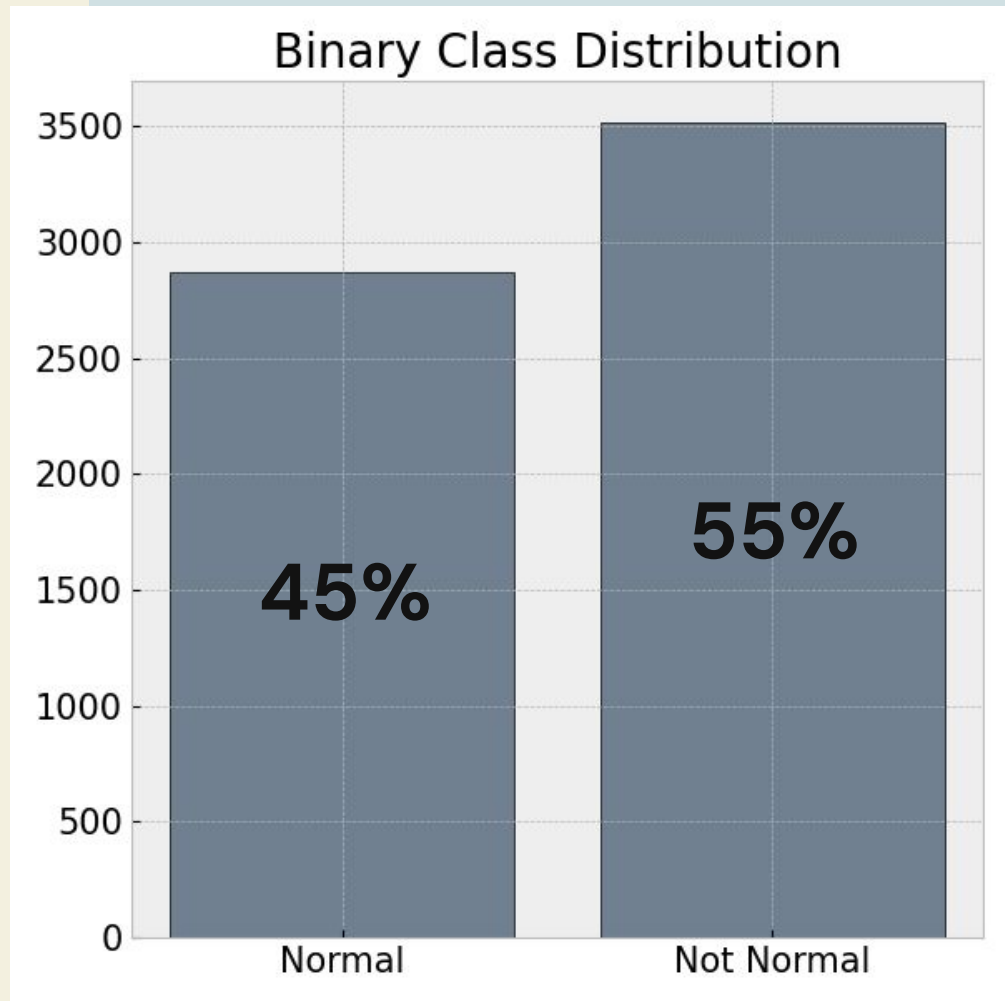

Augmentation

Modeling

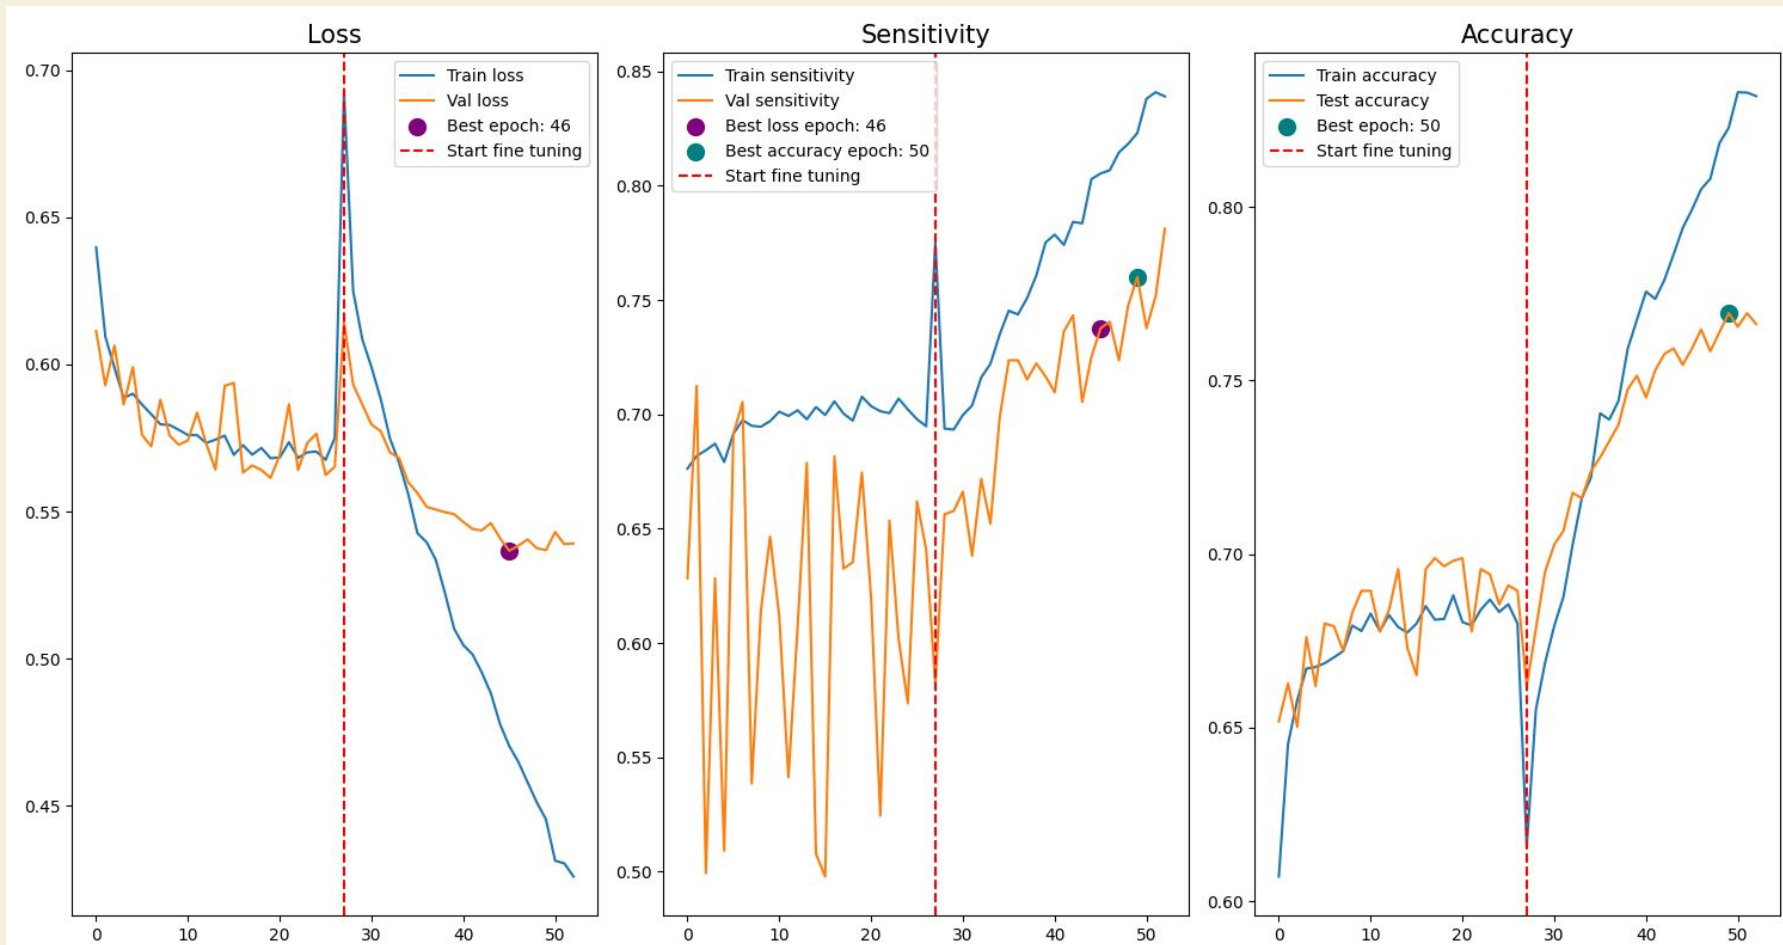

Baseline Model

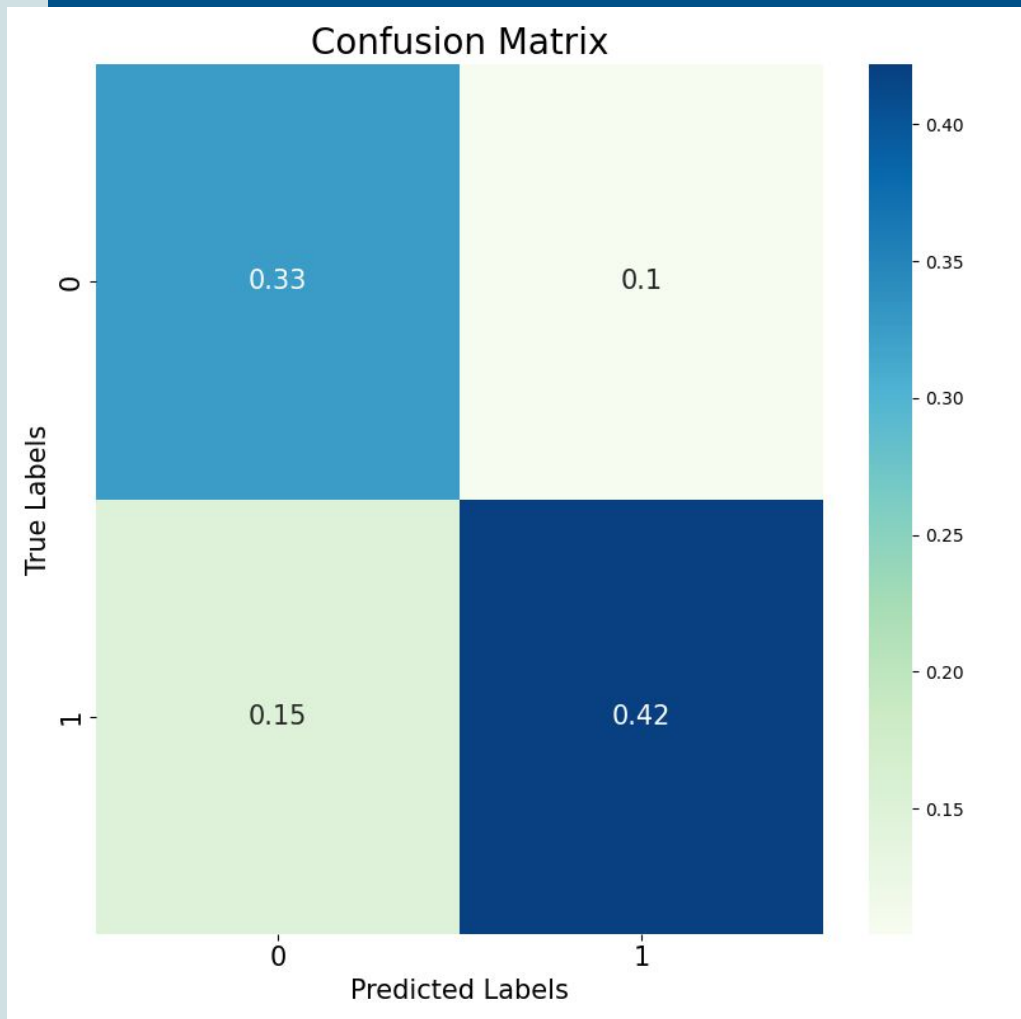

The Models

- CNN from scratch
- ResNet152V2
- Xception

Xception Performance

- **Test Accuracy**
74.77%
- **Test Sensitivity**
74.02%

Accurate Predictions

Prediction :1

Prediction :0

Prediction :1

False Positives

Conclusion

Next Steps

- Ensemble pretrained models
- Preprocessing techniques
- Hyperparameter tuning
- Additional augmentation
